

## **BRUSH CHIPPING POLICY**

The Service Department provides free curbside brush chipping for the community from October through May.

The city is divided into four wards. Crews try to get all brush in each ward before moving to the next. Brush may also be placed in the alley behind or beside the property. Please indicate this when calling 740-636-2380 to be put on pickup list.

Here is a list to help the crews maintain a schedule:

- Call service department to be put on a list for pickup.
- Stack brush as close to the curb as possible, not in the street, with the cut end toward the curb.
- 3" in diameter or less is all that can be accepted, any bigger is too big for chipper
- Cut brush to a maximum length of 12 feet.
- Stack piles so that branches do not become entangled.
- Must be brush only, nothing mixed in with brush.
- 2 pickups or 1 truck load per property per year.

Please note that delays in the schedule may occur after storms that cause an unusually high number of tree limbs to fall, if the paving program is in progress, or any other project that has to be completed by the street department, brush will be on hold until the project is completed.
