

## **CITY OF WASHINGTON COURT HOUSE**

### **FIRE HYDRANT FLUSHING**

The City of Washington Court House Water Department will be starting our spring flushing of fire hydrants on Monday, March 31, 2025. We will be starting in the North end of town on Peabody and continuing until completed.

Hydrant flushing is done yearly to improve water quality and to keep fire hydrants in good working condition. You may notice some discoloration in your water during this time, which is a temporary condition. The Water Department suggests turning the faucets on and allowing water to run clear.

If you have any questions or concerns regarding your water, please call the City Service Department at 740-636-2380.
